Experience

Rapido

Software Engineer 2

Apr 2025 – Present

Bangalore, Karnataka

- Led the architecture, implementation, and production rollout of multiple business-critical marketplace initiatives across order booking, captain search, and propagation systems, partnering with engineering, product, and business teams to deliver scalable, extensible solutions for Rapido's **7M+ daily-order** platform.
- Architected and developed Rapido's rider transparency feature, "X Captains Rejected Your Ride," within the booking retry flow, improving booking visibility and reducing platform-wide cancellations by **1.5%**.
- Designed and implemented a configurable fraud detection and enforcement framework within Rapido's core fraud engine, introducing dynamic captain-number masking and automated deactivation workflows that **reduced captain-reported complaints by 80%**.
- Spearheaded the migration of high-throughput Captain Prioritizer configurations (**800 RPS**) from SQL-backed storage to a centralized configuration platform, enabling real-time self-service configuration management while reducing engineering dependency and improving operational agility.
- Owned the end-to-end design and rollout of a cross-sell booking experience enabling users to place multiple orders within a single flow, improving Time-to-Acceptance (TTA) by **15%**. mentored interns and drove successful feature delivery through technical guidance and code reviews.

Wheelseye

Software Engineer

Jan 2023 – Mar 2025

Gurugram, Haryana

- Architected and developed a distributed URL shortening platform capable of generating **50K+ short links daily** and sustaining **400 RPM** with high availability, low-latency redirection, and an extensible service architecture.
- Engineered and scaled Wheelseye's SEO platform to manage **41.4M indexed pages**, with **6,000+ keywords** ranking on Google's first page, driving a **20% increase** in marketplace lead generation.
- Designed and built a reusable code-generation framework for microservices that automatically generated request/response models, enums, and Feign clients, reducing service integration effort by **80%** while improving development consistency and engineering velocity.
- Designed and implemented a configurable payment collection platform supporting multiple payment cycles and business workflows, restoring previously blocked payment operations and increasing business throughput by **20%**.

Wheelseye

Software Engineer Intern

Aug 2022 – Dec 2022

Gurugram, Haryana

- Engineered real-time vehicle tracking into the consignor application by integrating Google Maps, delivering live order visibility to **200K+ users** and driving a **7-minute increase** in average order tracking engagement.
- Architected and delivered an internal Content Management System (CMS) empowering a **10-member marketing team** to independently author, manage, and publish SEO pages — eliminating engineering dependency for content operations.

Mazecare

Software Engineer Intern

Apr 2022 – Jul 2022

Remote – Singapore

- Engineered and shipped multiple core modules of a Hospital Management System (HMS) — spanning patient profiles, medical reports, room management, and administrative workflows — supporting live operations across **10+ hospitals**.
- Architected RESTful backend APIs across multiple microservices, enabling seamless inter-module communication and improving long-term system maintainability and extensibility.

Skills

- **Languages & Frameworks:** Java, JavaScript/TypeScript, GoLang, Python, ReactJS, VueJS, Spring Boot, Node.js, Express
- **Databases & Platforms:** MySQL, PostgreSQL, MongoDB, Redis, Kafka, Linux, MacOS, AWS, Azure
- **CS Fundamentals:** Problem Solving, Microservices, Distributed systems, Design Patterns, System Design, SQL & NoSQL
- **Core Skills:** Data Structures & Algorithms, Problem Solving, DBMS, Networking, OOPs, OS

Education

Maharaja Agrasen Institute of Technology (GGSIU Delhi)

Bachelor of Technology in Information Technology

Aug 2019 - Jul 2023

9.1 CGPA

Achievements

Professional & Community

- Received the **Highest Performance Rating** twice and was recognized as **Employee of the Year** at Wheelseye.
- Won **1st Place** in Rapido's internal Hackathon and received the **Best Performer of the Quarter** award.
- Mentored **10,000+** students through collaborations with **6+ NGOs** and **5+ EdTech organizations**.
- Created technical educational content on YouTube with **200K+ total views**.
